Safe and Simple to Install
No Special Tools required for Installation
No Oversize Holes Needed
Can be Removed without Damage
Versatile Fixing Capability

M20x110 and M20x140 Blind Bolt are used for mounting the AWS equipment device to steel sleepers. Railtrack have identified advantages of using steel sleepers over conventional materials of wood and concrete, however, this presented a fixing difficulty. Installation is required on site with the need to remove equipment for maintenance.

Blind Bolt allows the attachment of all AWS components to the steel sleepers from the upper surface without the need for access to the underside. In this application Blind Bolts can be removed, so allowing for maintenance.

M20x110 AWS Kit - cat no. 57/150001
M20x140 AWS Kit - cat no. 57/150002
